Stephen and Mark,

Please see notes below and attached analytical results for the sampling conducted at Arkwood on April 22, 2013.

Jean

Jean,

Attached is the April sample results for the Arkwood site. The analytical report indicates concentrations similar to the recent past with the mouth sample reporting a concentration of 26.7 ug/L and the weir sample reporting a concentration below the method detection limit of 1.00 ug/L.

If you have any questions, please do not hesitate to contact me.

Best Regards,

*Jim*

Amanda,

The analytical report did not include a copy of the chain of custody and page 4 is blank (page 4 is the normal location for the chain of custody). Please attached the chain of custody and re-submit.

Best Regards,

*Jim*
